

## Moeller Company Group – Corporate Information

<b>Branch:</b>	Electrical engineering, industrial electronics
<b>Core competencies:</b>	Production, marketing and sales of components and systems for switching, protecting, commanding, signalling, controlling and visualisation of industrial production processes and machines; and for power distribution in infrastructural and residential buildings.
<b>Founded in:</b>	1899 in Cologne, Germany
<b>Employees:</b>	Approximately 9,550 worldwide (as per 04/30/2008)
<b>Headquarters:</b>	Bonn, Germany
<b>Consolidated sales:</b>	Approximately €1.048 million (2007/2008 financial year)
<b>Production facilities:</b>	15, worldwide
<b>Sales outlets:</b>	31 national sales companies, over 350 sales offices and distribution partners in over 90 countries

### Moeller Holding GmbH

#### Management Board:

Theo Kubat, Chairman of the Board (CEO)

- Sales and marketing
- Corporate communications
- Internal auditing
- Business Segment “Power Distribution”

Jochen Fischer (CFO)

- Finance
- Controlling
- IT
- Purchasing
- Logistics
- Human Resources
- Central Administration

Dr. Martin U. Scheffer

- Quality
- Patents
- I<sup>2</sup>PS
- R&D
- OEMs
- Production
- Business Segment “For motor applications”

**Products:****Business Segment “For motor applications”****xStart**

A complete range of devices for motor circuit tasks, ranging from contactors and efficient motor starters to variable-speed drives in new solutions for clever data communication:

- DIL power contactors
- PKZ motor-protective circuit-breakers
- MSC motor-starters
- DS 4 softstarters
- Frequency inverters
- Rapid Link distributed installation system

**xCommand**

Command and signalling devices coming in an attractive, ergonomic design for reliable and precise control current switching:

- RMQ command and signalling devices
- FAK foot and palm switches
- SL signal towers
- LS-Titan position switches
- T/P rotary switches
- ETR timing relays
- EMR measuring relays
- ESR safety relays

**xControl**

Innovative automation products for control, operation and monitoring of machines and electrical systems:

- Control relay
- Modular PLC
- Compact PLC
- Human Machine Interface
- Software

**Products:****Business Segment “Power Distribution”****Xclever home**

The complete range of electrical components for the home by Moeller. The extremely intelligent Xclever home components are designed to mix and match for enhanced convenience and convince electricians through easy applications while at the same time offering excellent value for money.

**Xpole**

Suggestion: Moeller’s protective switchgear always provide state-of-the-art technology and offer total protection for people and electrical systems in all kinds of buildings.

The latest generation of installation components for maximum operational safety, protecting people and electrical systems all over the world:

- Residual-current circuit-breakers
- Miniature circuit-breakers
- Combined RCD/MCB devices
- Overvoltage protection
- Remote switching systems
- Accessories

**Xboard**

Suggestion: The complete range of distribution boards offers safe power distribution in both single- and multi-family homes as well as in functional buildings – from 63 to 1600 amps.

The new distribution board concept for power distribution tasks includes:

- Miniature distribution boards
- Flat distribution boards
- Installation distributions boards
- Meter boards
- Add-on distribution boards

**xEnergy**

For reliable and safe controlling, switching and managing of power in industrial applications, in buildings and in machine construction. It provides innovative protection concepts with built-in diagnostics and communication functions, housed in modern switchboard systems:

- NZM circuit-breakers
- IZM circuit-breakers
- Switchgear devices for industrial applications
- Switchgear systems

**Xcomfort**

The Xcomfort product range by Moeller offers installation convenience as well as a wide range of possibilities for the home, such as lighting scenes at your fingertips, centralized control, emergency switching, presence simulation and much, much more:

- Moeller radio system
- Nikobus
- Switches and sockets
- EIB radio system components

**Xpatch**

A range of products and systems for setting up future-oriented data networks:

- 10" Enclosures for SOHO applications (small offices/home offices)
- 19" Wall-mounted and floor-standing distribution boards
- Routing cables and patch cords
- Fibre optic components
- Data sockets
- Accessories
